Flagship Mobile Application

- ❑ Broaden the usage of the information available at EAGLE portal
- ❑ Make this information available to mobile users (iOS & Android)
- ❑ A mobile user can take a photo of a visible epigraph with a mobile device and send it to the EAGLE portal
- ❑ The image recognition application at the EAGLE portal performs image recognition and returns the information associated with the epigraph
- ❑ One version, two usages:
  - – "general user", i.e. a person without a specific competence on epigraphy
  - – "scholar", i.e. a person knowledgeable about epigraphy

# Classic interface, with tabs
